Subject: International Seminar on Energy Integration Utilization & Conservation

In order to expand the market share, keep a continuous development, our company concentrates on exploiting the overseas market all the time. On October the 10th 2009 an international seminar on energy integration utilization & conservation was organized by our company in Beijing for the Vietnam Congress Delegation. During the seminar, the Energy Conservation Law of the P. R. C. and Supporting Policies & Measures were introduced to our Vietnam friends. The detail explanations on government monitoring, capital management and incentive policy of the enterprise energy conservation were made by Greens. Baicheng Greens Power Plant was used as an example during the meeting to introduce our company's technology and experience in the field of waste heat recovery system. The Vietnam Congress Delegation were very interested in this and invited Greens experts to Vietnam to have a look of their cement plants and steel mills on site in order to find cooperation opportunities.
